Re: Proposals for gasification plant in Sheepbridge

I am writing to express my concerns about the proposals from Cyclamax to build a gasification plant at the former Cammac Coal Yard in Sheepbridge.

I appreciate that it is inappropriate for Members of Parliament to get involved with planning applications, and I would usually avoid doing so. However, I have been contacted by many constituents who are very worried about the proximity of the proposed plant to such a densely populated area.

I am strongly in favour of sourcing energy from new and alternative technologies, but I share my constituents' concerns about building this kind of facility so close to residential areas.

I look forward to hearing the Council's decision on this application.

Best wishes,

Natascha
